Practical Life

Age 24-36 Months

5 Mins

About the Activity

Pasta isn't just for cooking! This sorting activity will support your child's understanding of similarities and differences in objects. Use easily distinguishable shapes for younger children and similar shapes for older children. It introduces mathematical concepts and concentration.

Activity Steps

1

Find a few different shapes of pasta and mix them all together on a tray.

2

Give each shape a separate bowl and demonstrate how to sort them.

3

Let them try for themselves and enjoy!

4

Extension If you have a pair of tongs handy, you can turn this into an opportunity for fine motor practice as well!
